ABOUT ME

I`am Mohamed Elattar, 18 years old. Full-Stack Developer specializing in building scalable React and Next.js ecosystems. Expert in crafting high-performance, motion-rich user interfaces and robust backend integration utilizing Node.js and Firebase. Focused on turning complex architectures into polished, user-centric digital products.

EDUCATIONS

- Certified Full- Stack & Web Developer
  Programming Training Academy : T-SQUARE
  September 2023

- Software Development Professional Certificate
  Ministry of Communications and Information Technology (MCIT), Egypt
  August 2024

ENGINEERING METHODOLOGIES

- Component-Driven Development (CDD) for scalable and reusable UI architecture.
- Implementing strict TypeScript typing to ensure type-safety and eliminate runtime errors.
- Optimizing performance via Next.js server-side rendering (SSR) and asset compression.
- Clean Code Practices based on modular structure and efficient Git version control.

SKILLS

- Frontend Architecture: React.js, Next.js, TypeScript, JavaScript
- Style & Motion: Tailwind CSS, Framer Motion
- Backend Ecosystem: Node.js, RESTful APIs
- Database & Cloud: Firebase Integration, MongoDB
- Development Tools: Git, GitHub, Electron Package

EXPERIENCE

- Full-Stack // Personal Production
  • Engineered a futuristic cyber-portfolio using Next.js, Framer Motion, and Tailwind CSS, featuring advanced 3D perspective overlays and interactive scheduler modules.
  • Architected and compiled optimized layouts reducing interaction latency and streamlining payload transmissions.

- Frontend Engineer // Web Application
  • Built 3 major high-performance web applications using modern JavaScript frameworks and seamless cloud integrations.
  • Developed cross-platform desktop integration architectures utilizing Electron Package frameworks.

- Full-Stack E-Commerce & Logistics Platform
  - Engineered a secure, full-stack e-commerce solution using the MERN stack.
  - Integrated Stripe for global payments alongside dynamic multi-currency and real-time exchange rate features.
  - Designed interactive, modular UI components with Tailwind CSS, achieving a 100% responsive user experience.
